

RightSpot[™]

pH INDICATOR

Is YOUR pH product designed specifically for use with Gastric Aspirate?
The RightSpotpH[™] Indicator is!

Aspirate enters Indicator behind pH paper reducing fluid color from obscuring test result.

Initial color of the **RightSpot[™] pH Indicator** strip may vary from tan to olive green. If strip is NOT within this range do not use.

NOTE: Connecting ends of Indicator vary. Use Indicator appropriate for tube.

Unique ON-DEVICE Reference Key for even those deemed colorblind.

RightSpotpH single-unit packaging prevents pH Paper's exposure to air, light, and humidity. Specimen aspirated into Indicator housing beneath the pH paper.

Clear Housing and Bulk Packaging allow for damaging environmental exposures. Aspirate Color may obscure true pH reading.

Why RightSpotpH[™] Indicators?

FDA Cleared to Verify Gastric Placement of any Tube
